Drupal 8 install theme manually

I'm not robot!

I'm not robot!

Facebook Twitter LinkedIn Installing themes in Drupal is perhaps one of the easiest ways to customize the site. Not only can you find color schemes and layouts to suit your needs, but many of them come with various blocks that allow for even greater expansion.When you begin to build a Drupal website, there are all kinds of things you'll want to do to make the site your own. Because impressions are so vastly important online, you need to make sure your site is pleasing for visitors.Finding the right theme to fit your needs may be the most difficult part of this process.In this Drupal themes tutorial, I'm going to show you how to install a new theme and give your site a stunning appearance.Installing Themes in DrupalThe first thing you need to do is find a theme you really want to use. You can search through the alternative themes available at Drupal's website or search for them from third-party developers.If you're using Drupal's website, change the "Core compatibility" to match your version and click search.If you find a theme that requires a newer version of Drupal, it may be a good idea to upgrade the platform. This will also keep your site safer from exploits and other issues down the road.One you find a theme you like, click the link to download the file for your version of Drupal.Download the tar.gz file for the theme to your computer.Go to your Drupal admin panel and click the "Appearance" tool.Click the button labeled, "+ Install new theme."Choose the theme file from your computer and click the "Install" button. If you the URL of the theme directly, you can also use that instead of a downloadable file.When the file is installed, click the "Administration pages" link.Click the Appearance tool from the Drupal admin tool bar again. This time, scroll down to the theme you just installed and click the "Install and set as default" link.Now your website has a new theme and is ready for content.Changing the Theme's SettingsSome themes have a variety of tools and options available depending on the developer. To access these, click on the "Settings" link of the theme you want to edit.Depending on the theme, you may have access to a myriad of custom options. Colors, logo images, font settings, layouts, header options and more can all be modified directly from the theme. Once you've made your customizations, click the "Save configuration" button to keep your changes.While Drupal web hosting is one of the most important aspects of your website, the overall appearance will determine whether people stay to read your content or move on. Color schemes, images and layout all contribute to the success of any site. Install themes in Drupal that accentuate your purposes and inspire your visitors with awe. Section 11.4, "Finding Themes" Section 3.2, "Concept: Additional Tools" You can use the administrative interface to download and install a contributed theme. If you are installing a custom theme rather than a contributed theme, if you see a message saying Installing modules and themes requires FTP access to your server, or if the steps below do not work to download and unpack the theme files, follow the steps in Section 11.6, "Manually Downloading Module or Theme Files". If you are using Composer to manage the files in your site, follow the steps for downloading in Section 3.5, "Using Composer to Download and Update Files". In either of these cases, you can then install the theme using Drush, or by continuing with step 7 in the instructions for the administrative interface below. On the theme's project page on drupal.org (for example, , scroll to the Downloads section at the bottom of the page. Right-click tar.gz to copy the address. In the Manage administrative menu, navigate to Appearance (admin/appearance). The Appearance page appears. Click Install new theme. The Install new theme page appears. In the field Install from a URL, paste the copied download link. This value could look like . Click Install to upload and unpack the new theme on the server. The files are being downloaded to the themes directory. Click Install newly added themes to return to the Appearance page. If you used the manual uploading procedure mentioned earlier, then you can continue with this step, and reach the Appearance page by using the Manage administrative menu and navigating to Appearance (admin/appearance). Locate the new theme under Uninstalled themes and click Install and set as default to use it. All non-administrative pages on the site will now use this new theme. Download and install a theme from Drupal.org.You can use the administrative interface to download and install a contributed theme. If you are installing a custom theme rather than a contributed theme, if you see a message saying Installing modules and themes requires FTP access to your server, or if the steps below do not work to download and unpack the theme files, follow the steps in Section 11.6, "Manually Downloading Module or Theme Files". If you are using Composer to manage the files in your site, follow the steps for downloading in Section 3.5, "Using Composer to Download and Update Files". In either of these cases, you can then install the theme using Drush, or by continuing with step 7 in the instructions for the administrative interface below.Using the administrative interface On the theme's project page on drupal.org (for example, , scroll to the Downloads section at the bottom of the page. Right-click tar.gz to copy the address. In the Manage administrative menu, navigate to Appearance (admin/appearance). The Appearance page appears. Click Install new theme. The Install new theme page appears. In the field Install from a URL, paste the copied download link. This value could look like . Click Install to upload and unpack the new theme on the server. The files are being downloaded to the themes directory. Click Install newly added themes to return to the Appearance page. If you used the manual uploading procedure mentioned earlier, then you can continue with this step, and reach the Appearance page by using the Manage administrative menu and navigating to Appearance (admin/appearance). Locate the new theme under Uninstalled themes and click Install and set as default to use it. All non-administrative pages on the site will now use this new theme. Using Drush to install a theme Find the project name for the theme you want to install, which is the last segment of the theme's project page URL. For example, if the project URL is the project name is honey. Download the theme using either the steps in Section 11.6, "Manually Downloading Module or Theme Files" or Section 3.5, "Using Composer to Download and Update Files". Run the following Drush commands, giving the project name (for example, honey) as a parameter: drush theme:enable honey drush config:set system.theme default honey Follow the instructions on the screen.
